

Slimline **2100**

ReIn Water Tank

Why let precious water, or your money, go down the drain?

The compact dimensions and removable wheels make it easy to maneuver the Slimline water tank to its installation location. The wheels simply snap on to the black pallet feet and the tank is ready to roll. This simplifies delivery and makes installation easier and lowers your cost.

Lockdown feet provide tank stability by bolting tank to concrete slab

With rainfall and our dam levels at an all time low and the price of water set to rise, there's never been a better time to install a ReIn water tank.

Thoughtfully designed to incorporate many unique and practical features, the ReIn Slimline 2100 provides the ideal solution for capturing precious rainwater to use around the home.

Designed to be visually appealing, the Slimline 2100's sleek form and low profile allow it to blend into your home environment rather than dominating it.

Removable wheels for easy movement to installation location

Once in place, the tank's unique lockdown feet enable it to be bolted to the concrete slab to ensure complete stability. This eliminates movement even when the tank is empty, preventing pipes from cracking. Rigid internal frames also add strength to ensure a structurally sound tank.

Naturally, water quality is the most crucial concern with any water source around the home.

To ensure this, the Slimline 2100 is a sealed unit with a snap-lock cover which fits snugly around the downpipe to eliminate entry of dust and any light which could cause algal growth. Fine stainless steel mesh in the leaf strainer and overflow also add a final barrier to contamination, insects and vermin.

Sturdy, stylish, secure and designed to last – the ReIn Slimline 2100 really is a watertight investment.

A multi award winning, quality endorsed company, ReIn is widely acclaimed by both industry and environmental forums for design and production of innovative, quality plastic products for Australian and international markets.

Slimline 2100

Smart design

Clean simple lines compliment rather than dominate your home environment.

2100 Litre capacity

Eligible for government rebates across Australia.

Complete and ready to install

The slim design allows easy access and installation.

Compact dimensions

Discreet low profile sits below most fence lines with straight sides to sit flush against your home.

Easy to move

Removable wheels make it easy to move tank to installation location

Lockdown feet

Slimline 2100 is designed to be bolted to the concrete slab.

Reversible lid

The lid can be reversed to suit your downpipe location.

Sealed tank

Prevents entry of vermin and insects and reduces algal growth.

Easy to maintain

Easy to clean stainless steel mosquito mesh in leaf strainer and overflow screen. Leaf strainer is screwed to the lid to restrain unauthorised access.

Standard water fittings

Suits Ø90 PVC stormwater pipe inlet and overflow 1" BSP outlet and tap.

Strength by design

The innovative design includes the latest polymer technology, internal frames and lockdown feet for long term structural integrity.
